

NAGALAND UNIVERSITY

(A Central University Estd. By the Act of Parliament No. 35 of 1989)

Department of Anthropology

Headquarters: Lumami 798627

Proposed Course structure for M.Sc./M.A. In Anthropology

With effect from: July 2024

SEMESTER – ONE		Total credit = 21	Total Mark = 450
COURSE NUMBER	NAME OF THE COURSE	Credit	Marks
ANTH-101 (T)	EVOLUTIONARY ANTHROPOLOGY	5	100
ANTH-102 (T)	SOCIAL AND CULTURAL ANTHROPOLOGY	5	100
ANTH-103 (T)	LINGUISTIC ANTHROPOLOGY	5	100
ANTH-104 (P)	SOMATOMETRY, CRANIOMETRY AND SOMATOSCOPY	2	50
ANTH-105 (P)	HUMAN GROWTH	2	50
ANTH-106 (P)	OSTEOLOGY AND OSTEOMETRY	2	50
SEMESTER – TWO		Total credit = 21	Total Mark = 450
COURSE NUMBER	NAME OF THE COURSE	Credit	Marks
ANTH-201 (T)	ANTHROPOLOGY OF INDIA	5	100
ANTH-202 (T)	ARCHEAOLOGICAL ANTHROPOLOGY	5	100
ANTH-203 (T)	ANTHROPOLOGICAL GENETICS	5	100
ANTH-204 (P)	ARCHEAOLOGICAL ANTHROPOLOGY	2	50
ANTH-205 (P)	ANTHROPOLOGICAL GENETICS	2	50
ANTH-206 (P)	MATERIAL CULTURE AND MUSEOLOGY	2	50

SEMESTER - THIRD		Total credit = 21	Total Mark = 450
COURSE NUMBER	NAME OF THE COURSE	Credit	Marks
COMMON PAPERS			
ANTH-301 (T)	RESEARCH METHODOLOGY	5	100
ANTH 302 (T)	DEMOGRAPHIC ANTHROPOLOGY	5	100
ANTH- 304 (P)	RESEARCH METHODOLOGY	2	50
ANTH-305 (P)	QUANTITATIVE ANALYSIS	2	50
ANTH-306 (P)	ANTHROPOLOGY OF DISASTER MANAGEMENT	2	50
ANTH-303.1(T)*	HUMAN GROWTH AND DEVELOPMENT	5	100
ANTH-303.2 (T)**	ANTHROPOLOGICAL THEORIES	5	100
*SPECIALIZATION IN BIOLOGICAL ANTHROPOLOGY			
**SPECIALIZATION IN SOCIAL AND CULTURAL ANTHROPOLOGY			

SEMESTER – FOUR			
COURSE NUMBER	NAME OF THE COURSE	Total credit= 21	Total marks = 450
SPECIALIZATION IN PHYSICAL/BIOLOGICAL ANTHROPOLOGY			
ANTH-401.1 (T)	HUMAN POPULATION GENETICS	5	100
ANTH-402.1 (T)	PHYSIOLOGICAL ANTHROPOLOGY	5	100
ANTH- 404 (P)	PHYSIOLOGICAL ANTHROPOLOGY	2	50
ANTH- 405	DISSERTATION	4	100
CHOICE BASED PAPER (ANY ONE PAPER FROM THE FOLLOWING)			
ANTHC-403.1A (T)	SPORTS ANTHROPOLOGY	5	100
ANTHC-403.1B (T)	MEDICAL GENETICS	5	100

SPECIALIZATION IN SOCIAL AND CULTURAL ANTHROPOLOGY		Total credit = 18	Total marks = 450
COURSE NUMBER	NAME OF COURSE		
ANTH-401.2 (T)	ECONOMIC AND DEVELOPMENTAL ANTHROPOLOGY	5	100
ANTH-402.2 (T)	TRIBES IN INDIAN CONTEXT	5	100
ANTH-404 (P)	VISUAL ANTHROPOLOGY AND DIGITAL DOCUMENTATION	2	50
ANTH-405	DISSERTATION	4	100
CHOICE BASED PAPER (ANY ONE PAPER FROM THE FOLLOWING)			
ANTHC-403.2A(T)	ANTHROPOLOGY OF HUMAN RIGHTS	5	100
ANTHC-403.2B (T)	MEDICAL ANTHROPOLOGY	5	100
ANTHC- 403.2C (T)	URBAN ANTHROPOLOY	5	100
ANTHC-403.2D (T)	ECOLOGY AND SOCIETY	5	100
ANTHC-403.2E (T)	BUSINESS ANTHROPOLOGY	5	100

T= Theory; P= Practical; ANTHC= Choice based paper; T [Internal = 25; Final =75]

Programme outcomes:

M.Sc programme in Anthropology aim at the following outcome:

- a. Proficient in evolutionary biology as applied to human evolution.
- b. Able to understand and analyze population genetics data.
- c. Cultural barriers or potency for economic growth and Development.
- d. Learn to communicate in context of cultural differences.
- e. Understand Business in cultural context and to navigate the market accordingly.
- f. Have real practical experience in fieldwork and report writing.
- g. Prepare the students for qualitative (especially focusing in ethnography) and quantitative research.
- h. Better understanding of human being as integrated biological and social being.
- i. Ability to develop the level of cultural tolerance.
- j. Potential to understand the social problem and work for possible solution.
- k. Ability to apply the theoretical and textual knowledge into the applied field.

Programme specific outcomes:

- a. Able to interpret molecular genetic data.
- b. Well verse in the use of statistics in research.
- c. Trained in methods of qualitative research.
- d. Able to use insights from anthropology in business.
- e. Experience in doing fieldwork and writing scientific report about it.
- f. Training in literature review, publications and article writing for journals.
- g. Awareness about the fundamental human rights of self and others.
- h. Ability to understand the significance of sustainable ecology and co-related cultural sustainability.
- i. To become a potential manpower under the situation of national disaster, in order to stabilize the affected people from the trauma.

Choice base papers offered by the Department at 4th semester:

ANTHC-403.1A (T)	SPORTS ANTHROPOLOGY
ANTHC-403.1B (T)	MEDICAL GENETICS
ANTHC-403.2A(T)	ANTHROPOLOGY OF HUMAN RIGHTS
ANTHC-403.2B (T)	MEDICAL ANTHROPOLOGY
ANTHC- 403.2C (T)	URBAN ANTHROPOLOY
ANTHC-403.2D (T)	ECOLOGY AND SOCIETY
ANTHC-403.2E (T)	BUSINESS ANTHROPOLOGY

Number of course having employability / entrepreneurship/ Skill development.

COURSE NO.	COURSE NAME	Activities having direct bearing on employability / entrepreneurship/ Skill development
ANTH-306 (P)	ANTHROPOLOGY OF DISASTER MANAGEMENT	To create potential manpower under the situation of national disaster, in order to stabilize the affected people from the trauma.
ANTHC-403.1A (T)	SPORTS ANTHROPOLOGY	<i>By imparting knowledge related to:</i> Kinanthropometry and its application to sports science. Biomechanics fundamentals and principles and its application to sports. Human anatomy and its application to performance and injury reduction. Application of nutrition science in sports science
ANTHC-403.2A(T)	ANTHROPOLOGY OF HUMAN RIGHTS	To create awareness about the fundamental human rights of self and others. Further, to build up the self awareness about right to culture and dignity, of being a Human.
ANTHC-403.2E (T)	BUSINESS ANTHROPOLOGY	<i>By imparting knowledge related to:</i> Organization behavior and management. Business innovation process. Principles of innovation in business. Entrepreneurship and its Determinants Consumer behaviour and marketing research
ANTHC-404 (P)	VISUAL ANTHROPOLOGY AND DIGITAL DOCUMENTATION	In the contemporary period a number of indigenous cultural practices are on the way of extinction. Adequate documentation about such practices are required for their preservation as well as a source of digital data base to the outer world. The paper is focused on these core objectives.

SEMESTER – ONE		
COURSE NUMBER	NAME OF THE COURSE	COURSE OUTCOME
ANTH-101 (T)	EVOLUTIONARY ANTHROPOLOGY	To acquire the conceptual knowledge regarding: Historical and contemporary theories of evolution. Relevant fossils for study of human evolution. Issues related to race and human variation. Molecular markers use in study of human variation.
ANTH-102 (T)	SOCIAL- CULTURAL ANTHROPOLOGY	This course introduces the students to the nature, scope, branches, development, basic concepts and applications of social/cultural anthropology as well as social/cultural institutions as a general component of its subject matter.
ANTH-103 (T)	LINGUISTIC ANTHROPOLOGY	To familiarize with key ideas, concepts and methods of linguistic anthropology, To understand the relationship between language, thought and culture, To acquaint students with the diversity and complexity of languages, To inculcate a working understanding of the subject to be able to confront any phenomena both academic as well as non-academic.
ANTH-104 (P)	SOMATOMETRY, CRANIOMETRY AND SOMATOSCOPY	To give hands on training to the students on: Measurements of body, skull and somatoscopy and application of such skills.
ANTH-105 (P)	HUMAN GROWTH	To give hands on training to the students on: Measurements of body relevant to the study of human growth and bio-medical studies.
ANTH-106 (P)	OSTEOLOGY AND OSTEOMETRY	To give hands on training to the students on: Diagrammatic representation of human bones and various techniques of bone measurements.
SEMESTER – TWO		
COURSE NUMBER	NAME OF THE COURSE	COURSE OUTCOME
ANTH-201 (T)	ANTHROPOLOGY OF INDIA	To trace the emergence and development of anthropology in India, To analyze and understand the shifts in the subject matter and the factors of such, To study the racial and linguistic diversity of India, To understand the historicity and politics of social and identity formation of Indian

		societies.
ANTH-202 (T)	ARCHEAOLOGICAL ANTHROPOLOGY	To acquire the conceptual knowledge regarding: Theoretical framework to understand human's past. Intellectual history of the study of human origin. Various stages in the development of tools and technology. Prehistoric past of Indian subcontinent.
ANTH-203 (T)	ANTHROPOLOGICAL GENETICS	To acquire the conceptual knowledge regarding: Technologies related to molecular genetics. Data analysis and interpretation of molecular human genetics. Human medical genetics. Fundamental of population genetics.
ANTH-204 (P)	ARCHEAOLOGICAL ANTHROPOLOGY	To provide hands on training on: Identification of rocks/ minerals. Diagrammatic representation of tools. Technical representation of tools. Description of tools and tool typology. Measurement of tools and calculation of indexes. Measurement of Flakes. Cataloguing of stone tools and artifacts.
ANTH-205 (P)	ANTHROPOLOGICAL GENETICS	To provide hands on training on: Detection of biochemical markers such as blood group, PTC. Study of colour blindness. Study of dematoglyphics Pedigree analysis Karyotyping.
ANTH-206 (P)	MATERIAL CULTURE AND MUSEOLOGY	To equip with skills of identification and description of specimens and their maintenance and care, To learn the importance of museums and the aspects of national heritage.
SEMESTER – THIRD		
COURSE NUMBER	NAME OF THE COURSE	COURSE OUTCOME
ANTH-301 (T)	RESEARCH METHODOLOGY	To familiarize with the basic concepts of research and research methodology, To understand the nature of anthropological research, fieldwork and ethnography, To learn and understand the various methods of data collection and their applications, To familiarize with the methods and

		techniques of data analysis and presentation.
ANTH- 302 (T)	DEMOGRAPHIC ANTHROPOLOGY	To acquire conceptual knowledge on: Demographic theories and its applications to anthropology. Sources of demographic data. Components of population change. Application and Analysis of Demographic data in anthropological research.
ANTH- 304 (P)	RESEARCH METHODOLOGY	This paper allows exposure and experience of: The process of data collection through different methods, The analysis of data for inference and reporting.
ANTH-305 (P)	QUANTITATIVE ANALYSIS	Hands on training on quantitative analysis of data and application of various statistical software.
ANTH-306 (P)	ANTHROPOLOGY OF DISASTER MANAGEMENT	To create potential manpower under the situation of national disaster, in order to stabilize the affected people from the trauma.
ANTH-303.1(T)	HUMAN GROWTH AND DEVELOPMENT	To acquire conceptual knowledge on: Concepts on human growth and development. Factors that affect human growth and development. Gene-environment interaction on human growth and development. Research methods for growth studies.
ANTH-303.2 (T)	ANTHROPOLOGICAL THEORIES	This course introduces the students to post-modern and emerging theories in Anthropology, which have contributed to emergence of social-cultural anthropology as a specialized branch of knowledge.

SEMESTER – FOUR		
COURSE NUMBER	NAME OF THE COURSE	COURSE OUTCOME
ANTH-401.1 (T)	HUMAN POPULATION GENETICS	To acquire conceptual knowledge on: Historical development of the concepts of population genetics. Various concepts and its application in human population genetics. Population genetic history. Pictorial representation of phylogenetics and population distance. Analysis and interpretation of

		phylogenetics data.
ANTH-402.1 (T)	PHYSIOLOGICAL ANTHROPOLOGY	To acquire conceptual knowledge on: Concepts of human physiology. Work physiology. Physical fitness and aging Physical response to various stresses. Physiological adaptations to various environments. Research methodologies of human physiological studies.
ANTH- 404 (P)	PHYSIOLOGICAL ANTHROPOLOGY	Hands on training on: Measurements/ calculation of various variables required for humanphysiological research and studies. Introduction to equipments used in humanphysiological research.
ANTH 405	DISSERTATION	To train the students to carry out anthropological research by undertaking ten days fieldwork with a particular research topic and to develop the data into a dissertation.
ANTHC-403.1A (T)	SPORTS ANTHROPOLOGY	To acquire conceptual knowledge on: Kinanthropometry and its application to sports science. Biomechanics fundamentals and principles and its application to sports. Human anatomy and its application to performance and injury reduction. Application of nutrition science in sports science
ANTHC- 403.1B (T)	MEDICAL GENETICS	Concepts related to medical genetics research. Genetics of cardiovascular diseases and Cancer. Role of RNA in medical genetic research. Concept of epigenetics and its application is medical genetics research
ANTH-401.2 (T)	ECONOMIC AND DEVELOPMENTAL ANTHROPOLOGY	To account the history and development of economic anthropology, To familiarize with the basic ideas and concepts and different approaches to understand economic systems, To learn and analyze the theories of development and development aid, To understand the relationship amongst culture, economy and development.
ANTH-402.2 (T)	TRIBES IN INDIAN CONTEXT	This course introduces the students to conceptualize the Tribe and to know about the

		Tribal culture of India from the Indian perspective. It has specially focused to understand the social and cultural changes as taking place in the Tribal societies of India as well as to address the problems of the Tribal people from the Indian perspective.
ANTH-404 (P)	VISUAL ANTHROPOLOGY AND DIGITAL DOCUMENTATION	In the contemporary period a number of indigenous cultural practices are on the way of extinction. Adequate documentation about such practices are required for their preservation as well as a source of digital data base to the outer world. The paper is focused on these core objectives.
ANTH-405	DISSERTATION	To train the students to carry out anthropological research by undertaking ten days fieldwork with a particular research topic and to develop the data into a dissertation.
ANTHC-403.2A(T)	ANTHROPOLOGY OF HUMAN RIGHTS	The paper is focused to develop the concept and practical application of Anthropological knowledge in the awareness of human rights. It has been framed to build up consciousness and protection of human rights, in wider social context, to establish the culture of peace and inter cultural integrity.
ANTHC-403.2B (T)	MEDICAL ANTHROPOLOGY	This course introduces the students about the fundamental concepts of medical anthropology by imparting knowledge on social ecology of health, health culture, ethnomedicine, cultural context of health and illness, and health care services in India.
ANTHC-403.2C (T)	URBAN ANTHROPOLOGY	The prime objective of the paper is to know about the history of urban development, urbanization process in Indian context. Further a special focus has been given on the emerging social problems of urban poverty, slums.
ANTHC-403.2D (T)	ECOLOGY AND SOCIETY	This course introduces the students to understand the relation between ecology and development. It is further focused to analyze in detail about the relationship between nature and culture. Further, the conceptual framework related to ecological sustainability and dilemma between development and conservation has been theoretically addressed.
ANTHC-403.2E (T)	BUSINESS ANTHROPOLOGY	To acquire knowledge on: Organization behavior and management. Business innovation process. Principles of innovation in business. Entrepreneurship and its Determinants Consumer behaviour and marketing research.

Note:

- Each theory paper shall consist of 100 marks (End session-75, Internal-25)
- Each theory paper consist of 5 units.
- Each practical paper has 50 marks (External 37.5; Internal 12.5)
- The optional papers offered will subject to the availability of faculties specialized in the concerned field.

Abbreviations used:

- ANTH-Anthropology
- ANTHC- Choice based paper in Anthropology
- T = Theory paper
- P = Practical paper

ANTH 101: EVOLUTIONARY ANTHROPOLOGY

Unit I: History and development of Physical Anthropology: Aim, scope and its relationship with allied disciplines. History of Evolutionary Thought; Theories of Evolution: Lamarckism, Neo-Lamarckism, Darwinism, Neo-Darwinism, Neutral Theory of evolution; Natural genetic engineering theory. Evolutionary development biology (Evo-Devo)

Unit II: History of the concept of Race; History of scientific racism and its applications in policy making; UNESCO statement of race. Classical, Chemical and Molecular markers of human genetic variations. Molecular human genetics and the Concept of Race.

Unit III: Classification, characteristics and distribution of living Primates; Primate fossils; Primate behaviour; Human mating behaviour. Functional Skeletal anatomy of Human and non-human primates; Primate Locomotion. Theories of the origin of Bipedalism.

Unit IV: Conditions and process of fossil formation; Fossils study: Distribution, Characteristics and Phylogenic status of *Sahelanthropustchadensis*, *Orrorintugenensis*, *Ardipithecusramidus*, Australopithecines and Paranthropus.

Unit V: Origin of Homo: *Homo habilis*, *Homo ergaster*, *Homo erectus*, *Homo neanderthalensis*, *Homo heidelbergensis*, *Homo sapiens*; Palaeopathology. Theories of the origin of modern *Homo sapiens*.

Suggested Readings:

Mark Stoneking.2016. An introduction to molecular Anthropology. Wiley Blackwell.

Larsen Spencer Clark, 2010. *A Companion to Biological Anthropology*. Wiley-Blackwell, UK.

Larsen Spencer Clark, 2010. *Essentials of Physical Anthropology*. WW Norton & company, Inc.

Noel Cameron, 2002. *Human Growth and Development*. St. Louis, Academic press.

Swindler D.A, 1998. *Introduction to Primates*. University of Washington press.

ANTH-102 (T) INTRODUCTION TO SOCIAL-CULTURAL ANTHROPOLOGY

UNIT I: Development of social-cultural anthropology. Different sub fields of social-cultural anthropology: Relationship with different other disciplines. Basic concepts: Society, Community, Association, Social structure, social organization, social institution, social groups, culture, components of culture, diffusion, acculturation, syncretism, multiculturalism

UNIT II: Family, Marriage and Kinship: Definition, types and functions of family; Definition, types and rules of marriage, marriage payments; Kinship: Definition of Kinship, Types and degrees of Kinship, Kinship terminologies, Kinship usage, Descent.

UNIT III: Religion and Magic: Anthropological approaches to the study of Religion; Theories of origin of Religion. Function of Religion. Animism, Animism, Animatism, Bongatism, Totemism; Magic, Sorcery and witch-craft; Magico-Religions Specialists.

UNIT IV: Economic Organizations: Characteristic features of primitive economy; Division of labour; Concept of property and inheritance; Different types of subsistence economy.

UNIT V: Political organization: Traditional political organization of the tribes; Social control; traditional and modern political system. Patterns of political organization, customary law and social sanction.

- Williams, R. (1990) *Cultural Anthropology*. New Jersey: Prentice Hall.

ANTH 103: INTRODUCTION TO LINGUISTIC ANTHROPOLOGY

UNIT I: Nature of language; linguistics and anthropology; linguistic research – methods of data collection and analysis; ethical issues in linguistic research; Linguistic families.

UNIT II: Language change and historical linguistics – sound law, semantic shift; contact languages; language imperialism; Language acquisition and socialization, language acquisition in bilingual and multilingual contexts.

UNIT III: Language, thought and culture: Linguistic relativity and the Boasian tradition; Neo-Whorfianism; Ethno-semantics – kinship terms, colour terminologies; speech community; meaning, mind, representation and enaction; literary practices and performance.

UNIT IV: Language, power and social differentiation: language and gender; language, race and ethnicity; language, power and agency.

UNIT V: Language death, factors and threats of language extinction; methods and challenges of revitalization; language and digital age.

Suggested Readings:

ANTH 104 (P): SOMATOMETRY, CRANIOMETRY AND SOMATOSCOPY

Cephalometry

1. Maximum head length
2. Maximum head breadth
3. Minimum frontal breadth
4. Maximum bizygomatic breadth
5. Bigonial breadth
6. Nasal height
7. Nasal Length
8. Nasal breadth
9. Physiognomic facial height
10. Morphological facial height
11. Physiognomic upper facial height
12. Head circumference
13. Stature
14. Sitting height
15. Body Weight

Somatoscopy

1. Head form
2. Hair form
3. Facial form
4. Eye form
5. Nose form
6. Hair colour

7. Eye colour
8. Skin colour.
9. Ear form

Craniometry

Direct and indirect measurements to be taken on skull and lower jaw

Skull

1. Maximum cranial length
2. Maximum cranial breadth
3. Maximum frontal breadth
4. Maximum Occipital breadth
5. Least frontal breadth
6. Palatal breadth
7. Palatal length
8. Maxillo-Alveolar Breadth
9. Facial depth/ Prosthion-Basion line
10. Outer Biorbital breadth/ upper Facial breadth
11. Inner Biorbital Breadth
12. Bizygomatic breadth
13. Bimaxillary breadth
14. Morphological Facial Height
15. Morphological superior Facial height
16. Anterior Inter orbital breadth
17. Nasal Height
18. Nasal breadth
19. Biauricular Breadth
20. Basion-Bregma length
21. Nasion-inion line
22. Nasion-Lambda line
23. Frontal chord
24. Parietal chord
25. Occipital chord
26. Frontal perpendicular
27. Parietal perpendicular
28. Occipital perpendicular

29. Calvarial height
30. Lambda Calvarial height

Angles

1. Metopic angle
2. Facial profile angle
3. Nasal profile angle
4. Alveolar profile angle
5. Profile angle of nasal root
6. Lambda Opisthion angle/ profile of occiput
7. Calvarial Based angle
8. Inclination angle of occipital foramen
9. Frontal Curvature angle
10. Parietal curvature angle
11. Occipital curvature angle
12. Superior curvature angle
13. Bregma Angle of Swhwalbe
14. Lambda angle of Swhwalbe
15. Relation of angles of superior Facial triangle.

Lower jaw (Mandible)

1. Bicondylar breadth
2. Bigonial breadth
3. Height of Ramus
4. Symphyseal Height
5. Minimum breadth of Ramus
6. Mandibular angle.

ANTH 105 (P): HUMAN GROWTH SHAPE AND SIZE MEASUREMENT

Size and shape measurements

1. Standing height vertex
2. Sitting Height vertex
3. Body weight
4. Total Right Upper Extremity Length (Direct & indirect)
5. Total Right Lower Extremity Length
6. Right Upper Arm Length

7. Right forearm length
8. Right hand breadth
9. Right hand length
10. Right foot length
11. Right foot breadth
12. Biacromial Breadth
13. Bicristal Breadth
14. Chest breadth (Transverse)
15. Chest depth (Sagittal)
16. Chest Girth
17. Minimum waist girth
18. Mid-upper arm girth
19. Maximum calf girth
20. Skinfold at triceps
21. Skinfold at biceps

Shape Growth ratios

1. Relative sitting Height vertex
2. Relative Right total upper extremity length
3. Relative Right total lower extremity length
4. Relative Right fore-arm length
5. Relative Right hand length
6. Relative Biacromial breadth
7. Relative Bicristal Breadth
8. Relative Head and face segment
9. Relative Head and Neck segment
10. Relative Height Gnathion
11. Relative Height cervicale
12. Relative Right upper arm length
13. Cephalic Index
14. Nasal index

ANTH 106 (P): OSTEOLOGY AND OSTEOMETRY

Osteology

Description and identification of the disarticulated skeleton of man

1. Skull
2. Mandible
3. Clavicle
4. Scapula
5. Vertebral column
6. Humerus
7. Radius
8. Ulna
9. Carpels
10. Metacarples and phalanges
11. Os-innominatum
12. Femur
13. Patella
14. Tibia
15. Fibula
16. Tarsal bones
17. Metatarsals and phalanges
18. Assessment of sex from skull, mandible and long bones
19. Assessment of age of skull and Mandible

Osteometry.

Measurements on the following bones

1. Femur
2. Tibia
3. Fibula
4. Pelvis
5. Scapula
6. Humerus
7. Radius
8. Ulna
9. Sacrum

ANTH 201(T): ARCHAEOLOGICAL ANTHROPOLOGY

UNIT I: Anthropological Archaeology: Aim, Scope and its relation with other allied disciplines. History of human origin research; Stratigraphy, Palaeo Environment, Dating methods, Exploration, Excavation and Preservation, Techniques and technologies of tool making. Typology of artifacts and tools.

UNIT II: Processual Archaeology, Post-Processual Archaeology, Interpretive Archaeology, Feminist Archaeology, Marxist Archaeology, Ethno-Archaeology, Environmental Archaeology, Community archaeology.

UNIT III: Palaeolithic of Africa; Lower Palaeolithic culture, Middle Palaeolithic culture and Upper Palaeolithic culture, Mesolithic culture and Neolithic culture of Europe; Palaeolithic Art of Europe.

UNIT IV: Prehistory of India: Lower Palaeolithic, Middle Palaeolithic, Upper Palaeolithic; Palaeolithic art; Mesolithic and Neolithic cultures. Indus valley civilization. Hoabinhian culture. Neolithic of China.

UNIT V: Cognitive archaeology: Concepts, Foundations, Methods, and Contemporary Debates. Cognitive ability of Acheulean, Neanderthal man and Upper Paleolithic period.

Suggested Readings:

Sankalia, H.D. 1974. *Prehistory and Protohistory of India and Pakistan*. Pune: Deccan College.

ANTH 202 (T): ANTHROPOLOGY OF INDIA

UNIT I: History of Anthropology in India: Emergence and development (phases and traditions); Colonial and post colonial traditions; Approaches to study the Indian society; Anthropology and nation building.

UNIT II: Indian social formations: Composition of India – Rural and urban social formation; Concept of urban cosmopolitanism. gender relations; Caste – theories of origin, structure and system, changes and its relevance. Caste and class dynamics, communalism in India.

UNIT III: Tribes of India: Classification and distribution, definition and its challenges; Tribal administration, welfare and development – approaches, plans and policies. Forest policies and its implications; Tribal problems and issues – land alienation, indebtedness, and displacement.

UNIT IV: Social change and social movements: factors of change; nature and characteristics of social movements; regional variations: northeast India, central India and south India.

UNIT V: Racial and linguistic diversity: Racial classification – meaning and relevance, racial classification of India – H. Risley, B. S. Guha, S. Sarkar; Linguistic classification of India; Linguistic affinity in North East India

Suggested Readings:

- Rao, M. S. A. 2002: *Social Movements in India*. Manohar publishers.

ANTH 203 (T): ANTHROPOLOGICAL GENETICS

UNIT I: Chromosomes, Gene, DNA – replication, transcription and translation, genetic code, gene expression; Mutation; Chromosomal aberrations - Numerical and Structural. DNA finger printing technology – DNA extraction, PCR, Electrophoresis, Automated DNA sequencing; Ancient DNA and aDNA technology.

UNIT II: Mendelian Inheritance in humans: Simple Autosomal Inheritance (Dominant, Recessive and co-dominance), Sex Linked Inheritance; Polygenic and multifactorial Inheritance; Variability in gene expression: Penetrance and Expressivity; Pleiotropism, Epistasis; Sex-influenced and Sex-limited genes.

UNIT III: Markers of human variation: Classical markers – ABO and RH blood groups polymorphism, HLA polymorphism, Haptoglobin polymorphism, G6PD polymorphism, Sickle cell anemia; Molecular markers – RFLPs, VNTRs, STRs, SNPs, CNVs, mtDNA, Y chromosomal DNA markers.

UNIT IV: Hardy – Weinberg principle and its application in Human genetics; Evolutionary factors: Natural selection, Mutation, Hybridization, Genetic drift; Polymorphism: Transient and balanced polymorphism; Inbreeding and its effect.

UNIT V: Human genome Project and Post Genomic phase; Molecular genetics of Single gene disorders – Huntington's Chorea, Haemophilia, Cystic Fibrosis; Molecular genetics of complex diseases – Cancer, Diabetes, CVDs; Genetic screening and counselling, Gene therapy and stem cell research and their social, ethical and legal implications.

ANTH 204 (P): ARCHAEOLOGICAL ANTHROPOLOGY

1. Fundamentals of line drawing/ draftsmanship
2. Identification of rocks/ minerals
3. Diagrammatic representation, description and tool typology of: -
 - a. Lower Palaeolithic culture.
 - b. Middle Palaeolithic culture.
 - c. Upper Palaeolithic culture.
 - d. Mesolithic culture
 - e. Neolithic culture
4. Measurement of tools and calculation of indexes
5. Measurement of Flakes
6. Cataloguing stone tools

ANTH 205 (P): SEROLOGY, COLOR BLINDNESS, PTC, KARYOTYPING, DERMATOGLYPHICS AND PEDIGREE ANALYSIS

1. ABO, MN and Rh blood group system
2. PTC
3. Colour Blindness test
4. Pedigree analysis for studying the mode of inheritance
5. Karyotyping
6. Dermatoglyphics

- a. Identification of pattern type
- b. Ridge counting
- c. Calculation of various indices
- d. Taking palmer prints
- e. Identification of palmar main lines
- f. Calculation of main line formula
- g. Main line index

ANTH-206 (P): MATERIAL CULTURE AND MUSEOLOGY

OBJECTIVE: By the end of this course, one should be able to

1. To equip with skills of identification and description of specimens and their maintenance and care
2. To learn the importance of museums and the aspects of national heritage

UNIT I: Introduction to museology: history of museum; assortment management; documentation, presentation and interpretation; architecture and exhibit design, research and archiving.

UNIT II: Maintenance and care: techniques and technology for preservation of specimen; conservation of cultural properties and national heritage; public programming and education; museum ethics; role of supportive organizations in museum development.

Suggested Readings:

Andrew McClellan. 2003. Art and its publics – Museum Studies at the Millennium. Blackwell Publishing Ltd.

ANTH 301 (T): RESEARCH METHODOLOGY

UNIT I: Concept of Research, Research, paradigm and Theory, Formulation of hypothesis, Data and types of data; Quantitative and Qualitative Research; Research problem, Research design and proposal; Research ethics

UNIT II: Nature of anthropological research. Fieldwork traditions, field notes and the makings of anthropology; Ethnographic research; reflexive ethnography; multi-sited fieldwork; fieldwork ethics.

UNIT III: Data collection: Observation, Interview, Questionnaire, Survey methods, and Sampling techniques; Case studies; Focus Group Discussion; Oral narratives; genealogy, historical and archives; Literature review and Bibliography.

UNIT IV: Qualitative data analysis – text analysis; hermeneutics/ interpretive, discourse, schema and metaphor, content analysis, grounded theory; models and matrices.

UNIT V: Quantitative data analysis – measures of central tendency (Mean, Median, Mode), Standard deviation, Measure of deviation, Measure of association. Tabulation, visual and Diagrammatic Representation; Report and Review writing.

Suggested Readings:

ANTH 302: DEMOGRAPHIC ANTHROPOLOGY

UNIT I: Emergence and development: Demographic anthropology – definition and scope; Relationship between anthropology and demography and other allied disciplines; Theories of population – classical theories, biological theories and social theories, demographic transition theory.

UNIT II: Sources of demographic data: Primary sources – census, civil and vital registration systems, National sample surveys (NSS), sample registration and modal surveys; Secondary

sources – demographic year book, Population Bulletin; Major producers of data – UN, World bank, US Census Bureau, National government and agencies.

UNIT III: Population composition: Age and sex composition – concepts, definition and challenges/ pitfalls, measurement and methods of analysis; Racial and ethnic composition, religion and language – concept and definition, relevance and application; Life expectancy and life tables.

UNIT IV: Components of population change – definition, data source and estimation, factors of change and issues: Fertility, Mortality and Migration; Morbidity – relationship with fertility and mortality.

UNIT V: Population projections, current trends and growth. Applied demography: Concepts, Public policy, Public health, Business demography.

Suggested Readings:

Bogue, 1969. *Principles of demography*.

Shryock, H.S and Siegel JS, 1971: *The methods and materials in Demography*.

Srivastava O.S, 2007. *Demography and population studies*. Quality publishing company. (1994 edition, if not available)

Murdock Steve, David Swanson, 2008. *Applied Demography in 21st Century*. Springer.

ANTH 304 (P): RESEARCH METHODS & TECHNIQUES

1. Construction of Genealogy.
2. Observation: Direct, indirect, participant, non participant, controlled.
3. Questionnaire and schedule, Interview-Unstructured, structured, Key informant interview.
4. Case study and life history.
5. Formulation of a research proposal.
6. Project report: Every student would undertake a project under which they will investigate a social problem.

ANTH 305 (P): QUANTITATIVE ANALYSIS

1. Presentation and summarization of data, types of variables and data presentation
2. Measurement of central tendency, standard deviation.
3. Correlation
4. Regression analysis.
5. Tests of significance: t-test, Chi square test, F-test
6. Chi-Square test and measure of association.
7. Analysis of variance- one-way, two-way, multiple
8. Statistical softwares.
- 9. Bayesian inference**

ANT-306: ANTHROPOLOGY OF DISASTER MANAGEMENT

UNIT I: Concept and Types of disaster; Disaster Management and Anthropology; Natural disaster management strategies; New Dimensions of Disaster- Industrial development, displacement, issues of rehabilitation; Trauma and the cultural support.

UNIT II: Environmental Degradation; Environmental and man made problems- pollution, floods, soil erosion, landslide, earthquakes, etc. and its socio-economic consequences; Coastal and riverine environmental disasters in India; Cases of coal mine industries; Disaster management strategies and its implementation.

Students have to submit a short report on Natural disaster and its impact on human society.

ANTH 303.1(T): HUMAN GROWTH AND DEVELOPMENT

UNIT I: Basic concepts of growth and development. Historical Background for the Study of Human Growth. Longitudinal Studies. Statistical Approaches. Technological Developments in Research Related to Growth. Current research methods for growth studies.

UNIT II: Stages of human growth: Prenatal Stages, Birth, Postnatal Life, Aging and Senescence. Catch up growth. Vertebrate and mammalian Foundations for human growth. Uniqueness of human growth spurt.

UNIT III: Body Proportions. Secular Trends. Body composition. Population variation in body composition. Adaptive value of body Size in various populations. Somatotyping. Effect of stress on Human Growth; Trade-Offs in Human Growth and Development.

UNIT IV: Genetics of Human Development. Genome-Wide Association Studies. Twin Studies. Biological Relatives (Non-Twins) approach. Effects of Genetic Aberrations on Growth. Epigenetic Factors. Endocrinology of Growth.

UNIT V: Theories of human growth and development. Environmental and biological factors influencing Human Development. Growth and development difference between human and nonhuman primate, sex and human populations.

Suggested Readings:

Noel Cameron (2002) *Human Growth and Development*. Academic Press.

Sara Stinson et al (2012) *Human biology : An evolutionary and biocultural perspective*. John Wiley & Sons, Inc., Hoboken, New Jersey

ANTH-303.2 (T): THEORIES OF SOCIAL AND CULTURAL ANTHROPOLOGY

UNIT I: Philosophical foundation of Anthropological Theories- Comte, Weber, Durkheim; Classical Anthropological Theories: i) Evolutionism- Unilinear, Universal and Multi-linear; ii) Diffusionism: British, German and American Diffusionary school.

UNIT II: Structural and Functional School: i) Structural Functionalism by A.R. Radcliffe Brown; ii) Functionalism and concept of need by B.K. Malinowski; iii) Social structure and

social organisation by Raymond Firth, S.F. Nadel, E.E. Evans Pritchard. iv) Structuralism by Levi Strauss and Post structuralism E. Leach.

UNIT III: Psychological school of thought: i) Ruth Benedict ii) Margaret Mead iii) Ralph Linton, iv) Abraham Kardiner, v) Alice Cora Du Bois.

Civilization school of thought: Robert Redfield, MacKim Marriott, Milton Singer, Oscar Lewis, Morris Opler.

UNIT IV: Contemporary Cultural Approach: Ontology, Epistemology, Phenomenology; Synchronic and Diachronic approach; Ideographic and Nomothetic approach; Inductive and Deductive principle; Symbolism and Interpretative theory- Clifford Geertz, Victor Turner, Mary Douglas, Gananath Obeyesekere; Concept of deep ecology and shallow ecology.

UNIT V: Globalization and Postmodern Theories: Globalization, Culture and Risk Society: Globalization by Arjun Appadurai, Risk society by Ulrich Beck

Post modern theory: Michael Foucault, Pierre Bourdieu, Jacques Derrida, Jean Baudrillard, J.F. Lyotard.

Suggested Readings:

ANTH- 401.1(T): HUMAN POPULATION GENETICS

UNIT I: Historical development of population genetics; Concept of genes, Concept of species, Mendelian populations; Concept of Hardy-Weinberg equilibrium; Testing equilibrium and measuring departure from it. Application of Hardy-Weinberg law in human population genetics.

UNIT II: Genetic polymorphism- basic concept of transient and balanced polymorphism. Natural selection, Darwinian fitness, selection relaxation, selection leading to change in gene frequency, and selection leading to change in genetic equilibrium. Models explaining the maintenance of genetic polymorphism (sickle cell and malaria);

UNIT III: Genetic isolates; Mutation-Mutation rate, Mutation Models for discrete alleles and DNA sequence, Muller's Ratchet; Genetic drift- Models of genetic drift, Effective population size; Gene flow/ Migration.

UNIT IV: Haldane's dilemma, The classical and balance hypotheses, Genetic load, Selectionist-Neutralist debate; Historical controversies in population genetics.

UNIT V: Consanguinity and inbreeding - (definitions and concept) Genetic consequences of inbreeding in human population, inbreeding coefficient and genetic load. Measures of Genetic diversity and tool used for Phylogenetic analysis. Inference of demographic history.

Suggested Readings:

Crow, James F, Motoo Kimura, 1970. *An introduction to population genetics theory*. Harper and Row.

Gillespie John H,1998. *Population genetics: A concise guide*. The John Hopkins University press, London.

Hamilton Matthew, 2009. *Population genetics* Wiley Blackwell.

Stoneking, Mark. 2016. *An Introduction to Molecular Anthropology*. Wiley-Blackwell

ANTH- 402.1 (T): PHYSIOLOGICAL ANTHROPOLOGY

UNIT I: Fundamentals of Work Physiology: Cardio-vascular and respiratory endurance, haemodynamics and exercise (blood pressure, pulse rate, heart rate and oxygen- transporting system, blood flow ,Hb, heamatocrit)

UNIT II: Physical working capacity and physical fitness methodology: evaluation of response and adaptation of the body to stress of exercise. Ageing and health related aspects of exercise.

UNIT III: Health and fitness; Variations in respiratory functions with age, sex and environment; Interrelationship of body measurements with respiratory functions. : Impact of smoking, alcohol, air pollution and occupation on cardio-respiratory functions.

UNIT IV: Regulation of body weight: energy expenditure and physical activity. Physical performance and environmental stress: heat stress, cold stress and high altitude, chronic diseases, malnutrition.

UNIT V: Body composition: methods of assessment; environmental and genetic contribution to obesity; treatment and prevention and management; Global prevalence and secular trends in obesity; regulation of body weight- energy expenditure and physical activity.

Suggested Readings:

Sherwood, Lauralee, 2008. *Human Physiology: From Cells to Systems* Brooks Cole.

Case, RM, Ed 1985. *Variations in Human Physiology*. Manchester University Press.

Davson Hugh, Eggleton, M Grace. Lea &Febiger 1968. *Principles of Human Physiology*
Functions

Vander, Arthur J; Sherman, James H; Luciano, Dorothys,1978. *Human Physiology: The Mechanisms of Body* McGraw-Hill Education.

Nageswari, K Sri; Sharma Rajeev, 2006. *Practical workbook of Human Physiology*. Jaypee Brothers. Medical Publisher.

Tudor Hale, 2003. *Exercise Physiology*. John Wiley & Sons Inc, England.

ANTHC-403.1A (T): SPORTS ANTHROPOLOGY

UNIT I: Body size, shape, composition, growth and maturation and their measures; Somatotyping; Human musculoskeletal system, joints and articulation, The Dynamics of Running. Assessment of posture and flexibility, Field methods of assessing physical activity and energy balance, Assessment of performance in team games. Scaling: adjusting physiological and performance measures for differences in body size.

UNIT II: Biomechanics of movement, Anatomical description and its limitations, Fundamentals and Principles for the application of biomechanics; Applications of biomechanics. Biomechanical foundations of strength and power training, Mechanical properties and performance in skeletal muscles, Muscle-Tendon architecture and athletic performance, Stretch–Shortening Cycle (SSC) of muscle function.

UNIT III: Qualitative and quantitative analysis in biomechanics. Body composition and athletes; Factors affecting performance: physiological factors, environmental, training and conditioning techniques; Principles of throwing, hitting and kicking, Mechanisms of Musculoskeletal Injury Sport-Related Spinal Injuries and Their Prevention; Impact Propagation and its Effects on the human body.

UNIT IV: Macro nutrients, Vitamins: Metabolic functions, Minerals, Fluid and Electrolyte Balance, Effects of dehydration and rehydration on performance, Rehydration and recovery after exercise. Exercise-induced oxidative Stress and antioxidant nutrients, Caffeine and Alcohol in Sport,

UNIT V: Sport-specific nutrition: Sprinting, Long distance running, Cycling, Swimming, Weightlifting, Weight Category Sports. Vegetarian Athlete. Temperature Regulation, Doping. The Female Athlete.

Suggested Readings:

Roger Eston and Thomas Reilly. 2009. *Kinanthropometry and Exercise Physiology Laboratory Manual*. (Vol 1 & 2) Routledge

Edward M. Winter et al.2007. *Sport and exercise physiology testing guidelines*. Routledge

ANTHC- 403.1B (T): MEDICAL GENETICS

UNIT I: History of Sickle cell genetics research, Gene expression, Regulatory RNA, Regulation of gene expression, Gene–Environment Interactions, Association studies, candidate genes, Genetic analysis of quantitative traits, Model organism, Genomics.

UNIT II: Distribution, trends, and determinants of cardiovascular disease, Gene–Environment Interactions in cardiovascular disease, Biochemistry and genetics of diabetes, hypertension, and coronary heart disease, Next-Generation Sequencing in Cardiovascular Disease Research.

UNIT III: Cancer as a genetic disease, Inherited predisposition to cancer, Cell protection mechanisms in cancer, Oncogenes, Tumor Suppressor Genes, Cancer Pathways, Apoptosis and Replicative Senescence in Cancer, , Cancers of the skin, Colon, Bladder, Liver, Breast, and nasopharyngeal.

UNIT IV: Epigenetics, Mechanisms of epigenetic inheritance, DNA methylation, Hereditary and Epigenetic Mechanisms in the Regulation of Gene Expression, Case Studies on Epigenetic Inheritance,

UNIT V: Epigenetic Dysregulation in Aging and Cancer, Impact of Genetic and Environmental Factors in Neurodegeneration. Epigenetic Biomarkers in Neurodegenerative Disorders.

Suggested Readings:

Wolfgang A Schulz. 2005. *Molecular biology of human cancers*. Springer

Alexander G. Haslberger. 2010. *Epigenetics and Human Health*. WILEY-VCH Verlag GmbH & Co. KGaA, Weinheim

John Mattick and Paulo Amaral. 2023. *RNA, the Epicenter of Genetic Information: A new understanding of molecular biology*. CRC Press

Darwin R. Labarthe. 2011. *Epidemiology and Prevention of Cardiovascular Diseases: A Global challenge*. Jones and Bartlett Publishers

Mark Sanders and John Bowman. 2017. *Genetic analysis: An integrated approach*. Pearson.

ANTH-404 (P): PHYSIOLOGICAL ANTHROPOLOGY

1. Measurement of human body composition
 - a. Simple indices of body fat distribution
 - b. Bioelectrical impedance analysis
2. Somatotyping
3. Flexibility measurements
4. Blood pressure
5. Heart rate/pulse rate
6. Hand Grip strength
7. Tidal volume
8. Vital capacity/forced vital capacity
9. Timed Expiratory volumes
10. Lung and respiratory muscle function
11. Strength testing
12. Exercise pressor response

Readings:

Roger Eston and Thomas Reilly. 2009. *Kinanthropometry and Exercise Physiology Laboratory Manual*. Routledge.

Edward M. Winter et al. 2007. *Sport and exercise physiology testing guidelines*. Routledge

ANTH 401.2 (T): ECONOMIC AND DEVELOPMENT ANTHROPOLOGY

UNIT I: Defining the economy and economic anthropology; concept of production, distribution and consumption; circulation and modes of exchange: Barter, Market, one-way economic transfer, gift exchange.

UNIT II: Concepts of property, Money, Finance; theories of value; concept of *Homo economicus* and its discontent; the formalist-substantivist debate and post debate trajectories.

UNIT III: Concept of economic growth and development; culture and economic growth; religion and economic growth; gender and economy, ethnicity and economy.

UNIT IV: Approaches in Development Anthropology; Theories of development: Modernization theory, Dependency and World System theory; Poverty and development; Aids for development – debates on its effectiveness; Relationship between Population and development.

UNIT V: Characteristics of underdevelopment; Obstacles to economic development; Development priorities in North-East. Cultural practices in Nagaland and its impact on development. Role of Anthropologist in Development.

Suggested Readings:

Harrison Lawrence E and Samuel P. Huntington, 2000. *Culture matters How values shape Human progress*. Basic Books

Bauer Peter 2000. *From Subsistence to Exchange* Princeton university press, New Jersey. Read chapter IV & V.

ANTH-402.2 TRIBES IN INDIAN CONTEXT

CONTENTS

UNIT I: Concept of Tribe- Theoretical, administrative issues; Salient characters and debates; Distribution and Classification of Indian Tribes: Racial, Economic, Geographical and Linguistic; Ethnicity and issues of Tribal identity.

UNIT II: Social structure and social organization of Indian Tribes- Concept of clan, lineage, phratry, moiety. Religious organization and concepts on Animism, Animatism, Naturism, Manaism, Shaman, Magic, Sorcery and Witchcraft.

UNIT III: Political organization- Concept of Band, Tribe, Chiefdom, State, Headman, Chieftain, Chief dome, Age grade; Oath and ordeal, codified law, traditional customary judiciary; Fifth schedule and Sixth schedule, concept of Autonomous council; Interaction between traditional and modern political organization.

UNIT IV: Tribal Development- Constitutional safeguards; Tribal developmental policies and programmes; Forest Policies and its implications. Tribal Issues: Land Alienation, Indebtedness and Tribal Displacement; Traditional health care practices and indigenous knowledge system.

UNIT V: Tribes in contemporary situation- Tribe- Caste Continuum; Hindu method of Tribal absorption; Sanskritization and Westernization. Tribal movements in the colonial, post colonial and contemporary period.

Suggested Readings:

ANTH-404 (P): VISUAL ANTHROPOLOGY

OBJECTIVE: In the contemporary period a number of indigenous cultural practices are on the way of extinction. Adequate documentation about such practices are required for their preservation as well as a source of digital data base to the outer world. The paper is focused on these core objectives.

UNIT-I: Fundamental concepts in visual anthropology. Usage of images in anthropological writings (Margaret Mead, Gregory Bateson, Malinowski)

UNIT- II: Anthropological study of visual representation such as museums and archiving, dance and other kinds of performance, visual arts, production and reception of mass media; ethnomusicology; visual culture, virtual ethnography; anthropology of dress and gendered embodiments.

Students have to submit a short report on any social event with digital documentation.

ANTH-405: DISSERTATION

Every student shall write a dissertation based on fieldwork. The dissertation carries 100 marks and it shall be submitted in partial fulfillment for the award of the degree of Master of Science in Anthropology. This dissertation shall be evaluated by an external examiner and a viva voce will also be conducted for the same.

Distribution of Marks for the Dissertation

Sl. No.	Particulars	Marks (total=100)
1.	Sessional assessment	25
2.	Dissertation	75

Note:

1. Last date of submission of dissertation: To be notified.
2. Submission of the dissertation is mandatory for the presentation and evaluation of the dissertation.
3. Number of copies to be submitted: 3 (three; soft bound) and 1 (one) soft copy.
4. Recommended format for dissertation:
Times New Roman, 12 Font, 1.5 Spacing, Justified.
5. Reference: APA format.
